WORK EXPERIENCE

LogoLife

Miami, FL (remote)

Software Engineer

July 2025 – Present

- Build and maintain full-stack product features for AcceptedX, a college counseling and education technology platform used by students, parents, counselors, and internal teams.
- Develop frontend interfaces using React, TypeScript, Tailwind CSS, and shadcn/ui while contributing to backend features, APIs, and application logic using Node.js, Express.js, MERN, and NestJS.
- Translate feature requests into frontend-to-backend implementation plans, including UI flow, backend logic, API handling, data requirements, and third-party integrations.
- Built meeting tools and proposal tracking features that improved scheduling operations across 262 meeting proposals and reduced manual coordination across sales, strategy, and counseling workflows.
- Expanded Parent View access for 824 parent accounts and improved Action Plan/My Plan notification workflows supporting 2,372 student planning reminders.
- Built and improved survey flows, application tracking, resume tools, pre-consultation signup flows, institution access, notifications, and internal team workflows.
- Integrated and worked with HubSpot CRM/API, webhooks, Redis, S3, Mailgun, Mapbox, BullMQ, OpenAI API, and other third-party services.
- Fixed bugs, improved UI/UX, patched existing features, and collaborated with product, operations, research, and counseling teams to align technical solutions with real user workflows.

City Government of Baguio

Baguio City, Philippines

Software Engineer Intern

Apr 2025 – May 2025

- Contributed to a real-time traffic monitoring web application using Laravel and Vue.js.
- Structured database schemas, integrated RESTful APIs, and created technical documentation and system diagrams for maintenance and onboarding.

PROJECTS

Traffic Monitoring System

- Designed and built a real-time traffic monitoring system that surfaces road conditions and helps users choose alternative routes.

Swapii Bartering Platform

- Built frontend features for a bartering platform, including interfaces for real-time chat, trade management, authentication, and review/rating systems

SKILLS

Frontend: React, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, HTML5, CSS3, Vue.js, Bootstrap

Backend/APIs: Node.js, Express.js, NestJS, Laravel, REST APIs, Webhooks, API Integration

Databases: MongoDB, MySQL, SQLite, SQL, NoSQL

Tools: Redis, S3, Mailgun, Mapbox, HubSpot CRM/API, Git, GitHub, Postman, BullMQ, Cron, Codex, Cursor, Claude Code, Visual Studio Code

EDUCATION

University of Baguio

Baguio City, Philippines

Bachelor of Science in Computer Science

June 2025
